NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

NOTE 1 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Business and Basis of Presentation - The consolidated financial statements include the accounts of Armanino Foods of Distinction, Inc. (the "Company"), which engages in the production and marketing of upscale and innovative food products, including primarily frozen pesto and other sauces, frozen pasta products, cooked and frozen meat and poultry products, garlic spreads and its wholly-owned dormant subsidiary AFDI, Inc. which was incorporated in May 1995.

Consolidation - All significant inter-company accounts and transactions have been eliminated in consolidation.

Cash and Cash Equivalents - The Company considers all highly liquid debt instruments purchased with a maturity of three months or less to be cash equivalents. The Company had $4,878,345 and $3,282,919 in excess of federally insured amounts in its bank accounts at June 30, 2017 and December 31, 2016.

Certificates of Deposit and Treasury Bills - The Company accounts for investments in debt and equity securities in accordance with Financial Accounting Standards Board ("FASB") Accounting Standards Codification ("ASC") ASC Topic 320 Investments – Debt and Equity Securities. Under Topic 320 the Company's certificates of deposit and treasury bills (debt securities) have been classified as held-to-maturity and are recorded at amortized cost. Held-to-maturity securities represent those securities that the Company has both the positive intent and ability to hold until maturity. At June 30, 2017, the Company had thirteen certificates of deposit with a purchase value of $1,131,636 and a fair value totaling $1,136,687, amortized value totaling $1,136,687 and mature through April 29, 2019. At December 31, 2016, the Company had ten certificates of deposit with a purchase value of $866,686 and a fair value totaling $871,787, amortized value totaling $871,787 and mature through Apri1 29, 2019.

Accounts Receivable - Accounts receivable consist of trade receivables arising in the normal course of business. At June 30, 2017 and December 31, 2016, the Company has established an allowance for doubtful accounts of $10,000 and $10,000, respectively, which reflects the Company's best estimate of probable losses inherent in the accounts receivable balance. The Company determines the allowance based on known troubled accounts, historical experience, and other currently available evidence. Amounts written off for the years presented are insignificant for disclosure.

Inventory - Inventory is carried at the lower of cost or market, as determined on the first-in, first-out method.

Property and Equipment - Property and equipment are stated at cost. Expenditures for major renewals and betterments that extend the useful lives of property and equipment are capitalized, upon being placed in service. Expenditures for maintenance and repairs are charged to expense as incurred. Depreciation is computed for financial statement purposes on a straight-line basis over the estimated useful lives of the assets which range from two to twenty-five years (See Note 4).

Intangible Assets - Intangible assets consist of Goodwill and indefinite life intangible assets which include proprietary formulas and trademarks. Goodwill represents the excess of purchase price paid over the fair market value of identifiable net assets of companies acquired. The Company accounts for goodwill and indefinite life intangible assets in accordance with FASB ASC Topic 350, "Goodwill and Other Intangible Assets" and accordingly tests these assets at least annually for impairment.

Revenue Recognition and Sales Incentives - The Company accounts for revenue recognition in accordance with the Securities and Exchange Commission Staff Accounting Bulletin No. 101, "Revenue Recognition in Financial Statements" (SAB 101), FASB ASC 605. The Company recognizes revenue when rights and risk of ownership have passed to the customer, when there is persuasive evidence of an arrangement, product has been shipped or delivered to the customer, the price and terms are finalized, and collections of resulting receivable is reasonably assured. Products are primarily shipped FOB shipping point at which time title passes to the customer. In some instances, the Company uses common carriers for the delivery of products. In these arrangements, sales are recognized upon delivery to the customer. The Company's revenue arrangements with its customers often include early payment discounts and such sales incentives as trade allowances, promotions and co-operative advertising. These sales incentives are recorded at the later of when revenue is recognized or when the incentives are offered. Sales incentives that do not provide an identifiable benefit or provide a benefit where the Company could not have entered into an exchange transaction with a party other than the customer are netted against revenues. Incentives providing an identifiable benefit, where the Company could have entered into the same transaction with a party other than the customer, are classified under "General, administrative and selling expenses" in the Operating Expenses section of the Consolidated Statements of Earnings.

Income Taxes - The Company accounts for income taxes in accordance with FASB ASC Topic 740 for Income Taxes. This statement requires an asset and liability approach for accounting for income taxes.

Earnings Per Share -The Company calculates earnings per share in accordance with FASB ASC 260 Earnings Per Share. Basic earnings per common share (EPS) are based on the weighted average number of common shares outstanding during each period. Diluted earnings per common share are based on shares outstanding (computed as under basic EPS) and potentially dilutive common shares. Potential common shares included in the diluted earnings per share calculation include in-the-money stock options that have been granted but have not been exercised.

Fair Value of Financial Instruments - The Company accounts for fair value measurements for financial assets and financial liabilities in accordance with FASB ASC Topic 820. The authoritative guidance, which, among other things, defines fair value, establishes a consistent framework for measuring fair value and expands disclosure for each major asset and liability category measured at fair value on either a recurring or nonrecurring basis. Fair value is defined as the exit price, representing the amount that would either be received to sell an asset or be paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or liability. As a basis for considering such assumptions, the guidance establishes a three-tier fair value hierarchy, which prioritizes the inputs used in measuring fair value as follows:

Level 1. Observable inputs such as quoted prices in active markets for identical assets or liabilities;

Level 2. Inputs, other than the quoted prices in active markets, that are observable either directly or indirectly; and

Level 3. Unobservable inputs in which there is little or no market data, which require the reporting entity to develop its own assumptions.

Unless otherwise disclosed, the fair value of the Company's financial instruments including cash, accounts receivable, prepaid expenses, accounts payable, accrued expenses and notes payable approximates their recorded values due to their short-term maturities.

Accounting Estimates - The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosures of contingent assets and liabilities at the date of the financial statements and the reported amount of revenues and expenses during the reporting period. Actual results could differ from those estimated.

Stock Options - The Company accounts for the stock option issued in accordance with FASB ASC Topic 718, Stock Compensation, accordingly the fair value of options issued is recognized over the vesting period of the underlying options.

Recent Accounting Pronouncements - Recent accounting pronouncements issued by the FASB did not or are not believed by management to have a material impact on the Company's present or future financial statements.

NOTE 2 - RELATED PARTY TRANSACTIONS

NOTE 8 - DERIVATIVE FINANCIAL INSTRUMENTS

In the normal course of business, the Company is exposed to certain risks related to fluctuations in interest rates. The Company uses a derivative contract interest rate swap to manage risks from these market fluctuations. The financial instruments used by the Company are straight-forward, non-leveraged instruments. The counterparties to these financial instruments are financial institutions with strong credit ratings. The Company maintains control over the size of positions entered into with any one counterparty and regularly monitors the credit ratings of these institutions.

Interest Rate Risk - The Company was exposed to changes in interest rates on its $2,000,000 Note payable / Line of Credit until the note was paid off in May of 2017. In order to manage this risk, on April 29, 2011, and May 2, 2012 the Company entered into a five year interest rate swap agreement to manage interest costs and the risk associated with changing interest rates. The Company designated this interest rate swap as a cash flow hedge of floating rate borrowings and expects the hedge to be highly effective in offsetting fluctuations in the designated interest payments resulting from changes in the benchmark interest rate. The gains and losses on the designated swap agreement will offset changes in the interest rate of the $2,000,000 Note payable / line of credit, which enabled the Company to effectively lock in a fixed 4.5% interest rate on the $1,000,000 which it had drawn through June 30, 2011, and to effectively lock in a fixed 3.9% interest rate on the remaining $1,000,000 of the $2,000,000 Note payable / line of credit which it had drawn down through June 30, 2012. The Company formally documented the effectiveness of this qualifying hedge instrument (both at the inception of the swap and on an ongoing basis) in offsetting changes in cash flows of the hedged transaction. The fair value of the interest rate swap is calculated as described in Note 9, “Fair Value of Financial Instruments”, taking into consideration current interest rates and the current creditworthiness of the counterparties or the Company, as applicable.

As a result of this swap, the Company paid interest at a fixed rate and receive payment at a variable rate beginning on April 29, 2011 and May 2, 2012. The swap effectively fixed the interest rate to 4.5% on $1,000,000 and 3.9% on the remaining $1,000,000 under the Note Payable, with the outstanding balance subject to the swap declining over time. The interest rate swap expired on April 29, 2016 and May 2, 2017. The effective portion of the change in value of the swap is reflected as a component of comprehensive income and recognized as Interest expense, net as payments are paid or accrued. The remaining gain or loss in excess of the cumulative change in the present value of the future cash flows of the hedged item, if any (i.e., the ineffective portion) or hedge components excluded from the assessment of effectiveness are recognized as Interest expense, net during the current period.

As of June 30, 2017, the derivative instruments had expired.

The effect of derivative instruments on the Consolidated Statements of Income for the three and six months ended June 30, 2017 and 2016 was as follows:

Derivatives Designated as Cash Flow Hedging Relationships	Amount of Gain/(Loss) Recognized in Accumulated OCL on Derivative (Effective Portion)	Location of Gain/(Loss) Reclassified from Accumulated OCL into Income (Effective Portion)	Amount of Gain/(Loss) Reclassified from Accumulated OCL into Income (Effective Portion)	Location of Gain/(Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)	Amount of Gain/(Loss) Recognized in Income on Derivative (Ineffective Portion and Amount Excluded from Effectiveness Testing)
For the six months ended June 30, 2017:

For the six months ended June 30, 2016:

NOTE 9 – FAIR VALUE OF FINANCIAL INSTRUMENTS

The Fair Value Measurement and Disclosure Topic of FASB and ASC:

- Defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, and establishes a framework for measuring fair value;

- Establishes a three-level hierarchy for fair value measurement based upon the transparency of inputs to the valuation as of the measurement date;

- Expands disclosures about financial instruments measured at fair value.

Financial assets and financial liabilities record on the Balance sheet at fair value are categorized based on the reliability of inputs to the valuation techniques as follows:

Level 1: Financial assets and financial liabilities whose values are based on unadjusted quoted prices for identical assets or liabilities in an active market that the Company can access.

Level 2: Financial assets and financial liabilities whose values are based on the following:

Quoted prices for similar assets or liabilities in active markets; quoted prices for identical or similar assets or liabilities in non-active markets or Valuation models whose inputs are observable, directly or indirectly, for substantially the full term of the assets or liability.

Level 3: Financial assets and financial liabilities whose values are based on prices or valuation techniques that require inputs that are both unobservable and significant to the overall fair value measurement. These inputs may reflect our estimates of the assumptions that market participants would use in valuing the financial assets and financial liabilities.

The following tables summarize Level 1, 2 and 3 financial assets and financial (liabilities) by their classification in the Statement of Financial Position:

As of June 30, 2017	Level 1	Level 2	Level 3
Interest Rate Swap	-	$ -	-
Total	-	$ -	-

As of December 31, 2016	Level 1	Level 2	Level 3

Total	-	$ (751)	-

NOTE 10 - AGREEMENTS AND COMMITMENTS

Manufacturing - Certain of the Company's products are manufactured and packaged on a "co-pack" or "toll-pack" basis by third parties at agreed upon prices. The agreements with the co-packers have terms of one year and allow for periodic price adjustments. These agreements generally allow for either party to give a two months' cancellation notice.

401(K) Profit Sharing Plan - The Company has a 401(K) profit sharing plan and trust that covers all employees. The Company matches 50% up to a maximum of 7% deferral. NOTE 11 - INCOME TAXES

The Company accounts for income taxes in accordance with FASB ASC Topic 740 which requires the Company to provide a net deferred tax asset or liability equal to the expected future tax benefit or expense of temporary reporting differences between book and tax accounting and any available operating loss or tax credit carry forwards. At June 30, 2017, and December 31, 2016, the total of all deferred tax assets was $109,293 and $109,359, respectively, and the total of the deferred tax liabilities was $132,614 and $132,613, respectively. The amount of and ultimate realization of the benefits from the deferred tax assets for income tax purposes is dependent, in part, upon the tax laws in effect, the Company's future earnings, and other future events, the effects of which cannot be determined.

The temporary differences, tax credits and carry forwards gave rise to the following deferred tax asset (liabilities) at June 30, 2017 and December 31, 2016:

	June 30, 2017	December 31, 2016
Inventory 263A adjustment	$ 39,303	$ 39,303
Reserve for accrued vacation	69,990	69,990
Other	-	66
	109,293	109,359
Excess of tax over book depreciation	(132,614)	(132,613)
Deferred Tax Liability, Net	$ (23,321)	$ (23,254)

Management estimates that the Company will generate adequate net profits to use the deferred tax assets, consequently, a valuation allowance has not been recorded.

The Company files U.S. federal, and California state income tax returns, and is generally no longer subject to tax examinations for years prior to 2014 for U.S. federal and U.S. states tax returns.

SUPPLEMENTAL INFORMATION

1. MANAGEMENT DISCUSSION AND ANALYSIS

A. Results of Operations

Liquidity and Capital Resources - At June 30, 2017, the Company had working capital of $11,313,774 compared to $10,300,239 at December 31, 2016. This increase is mainly due to the increase in cash and accounts receivable, offset by the decrease in inventory and increase in accounts payable trade, during the second quarter of 2017. The Company's strong cash position has enabled it to pay down its debt used to repurchase common shares, and declare another quarterly dividend - the Company's 69th consecutive regular quarterly dividend.

In the third quarter of 2016, the Company's Board of Directors approved a plant expansion of the Company's manufacturing plant facility that was budgeted to cost approximately $3.5 million. In order to finance the plant expansion project, on September 30, 2016 the Company secured a non-revolving $3,100,000 line of credit with a financial institution. The availability period for this line ends on September 15, 2017. The line accrues interest at a fixed rate of 3.35% and is secured by all of the Company's personal property. At June 30, 2017, there was $1,131,961 outstanding on the line with $1,968,039 available on the line. On January 3, 2017, the Company also secured a $550,000 equipment loan with a financial institution. The loan will be secured by the new equipment and accrue interest at a fixed rate of 4.25%. At June 30, 2017, there was $247,706 outstanding on the note with $302,294 available on the note. The Company intends to keep total spending for the project within the budget approved by the Board.

The Company began construction of its plant expansion project in February of 2017 and has made significant progress on this project since then. As of the end of this second quarter, the Company spent a total of $1,387,308 on this project. The Company estimates that the project will be completed before the end of the third quarter of 2017.

Results of Operations - Net sales for the quarter ending June 30, 2017 increased by 18% to $10,264,703 from $8,704,319 in the same quarter last year. Sales to the Company's existing customer base were strong across all product categories during the second quarter of 2017. Existing customer sales were augmented by sales to new US based customers who initiated strong inventory positions of the Company's products because of strong demand. Sales in the Company's Asian markets were higher this quarter than the same period last year; however, year to date sales were still lower than the comparable period of 2016.

The Company remains cautiously optimistic about its financial performance for the remainder of this year. Although the Company's current sales pipeline is strong, it doesn't believe that the high rate of growth it experienced in the second quarter will be repeated in the next two quarters, particularly since business from a previously announced new customer has been delayed for consideration into 2018. The Company continues to aggressively invest in domestic promotional expenditures in order to grow in the US market. It remains guarded with its outlook in its Asian markets because weak economic conditions continue to plague that part of the world.

Cost of goods sold as a percentage of net sales for the quarter ending June 30, 2017 was 65% compared to 63% during the second quarter last year. This increase is largely due to the effects of a change in the mix of products sold this year versus last year.

Operating expenses as a percentage of net sales for the quarter ending June 30, 2017 were 16% compared to 18% during the same quarter last year. This is mainly due to the effects of higher net sales compared to the same comparative period.

Net income of $1,280,427 for the three months ended June 30, 2017 increased $186,982, or 17%, versus net income of $1,093,445 for the three months ended June 30, 2016, reflecting higher demand for the Company's products while achieving economies of scale in its overall costs.

Cash Flow - For the six months ending June 30, 2017, cash flow from operating activities increased by $1,431,539, to $2,683,271 from $1,251,732 in the same period last year. This increase is largely a result of the company's increase in net income, decrease in inventory and timing of payments to suppliers offset by the timing in collections of receivables from customers.

For the six months ending June 30, 2017, cash flow used in investing activities increased by $1,328,955, to $1,566,038 from $237,083 in the same period last year. This was largely a result of spending associated with its plant expansion project as well as the purchase of certificates of deposit.

Net cash provided by financing activities for the six months ending June 30, 2017 was $7,095 compared to net cash used in financing activities of $<1,413,979> in the same period of 2016. The change is a result of proceeds from the line of credit to finance the plant expansion and improvements, offset by dividends paid and final payments on the Company's notes payable to previously repurchase common shares.

While the Company's cash flow is currently strong it intends to closely manage its cash flow activities for the remainder of 2017.

B. Off-Balance Sheet Arrangements - The Company has no off-balance sheet arrangements.
